C programming tutorial. A program consists of functions that contain instructions given to a machine to perform a task. The process of writing it includes designing an algorithm, drawing a flowchart, and then writing code. After writing it, you need to test it and debug it if it does not produce the required output. To write a program, you need a text editor (use your favorite one) and a ...

Java-based version of my 1995 textbook The Art and Science of C. My hope is that I can use much of the existing material in writing the new book, although quite a bit of the material and overall organization have to change. At this point, the material is still in a preliminary form, and the feedback I get from those of you who are taking this course will almost certainly lead to some changes ...
