In Handbook of Liquefied Natural Gas, 2014. 3.3.1.8 Utility systems. Process cooling systems in FLNG typically use seawater, because air coolers would take up extensive deck space. Seawater cooling can be in either an open or closed loop. In an open loop system, seawater is drawn in, filtered, treated to avoid fouling, pumped through the heat exchangers in the refrigeration systems, and then ...

Further, NAB reminded the FCC that any proposals to share C-band spectrum with wireless companies to date have been based on the assumption that 4,700 registered or licensed C-band earth stations exist. However, the agency's current registration window has seen thousands more register. "As of October 26, there were approximately 16,500 C-band earth stations registered in the Commission's ...
