World energy consumption is the total energy produced and used by humans. Typically measured per year, it involves all energy harnessed from every energy source applied towards activity across all industrial and technological sectors, in every country. It does not include energy from food. World energy consumption has implications for the socio-economic-political sphere.

Advancement should be a natural outcome of a well-rounded unit program, rich in opportunities to work toward the ranks. It is important to note, as with any educational opportunity, a rank or award is not the end of the learning process. In Scouting, after a requirement has been passed, the Scout is placed in practical situations that build retention through repeated use of skills. For example ...
