Neuroendocrine Tumors - These neoplasms are far less common than the exocrine neoplasms listed above. Neuroendocrine neoplasms (also known as endocrine or islet cell tumors) account for about 1-5% of pancreatic cancers. It is very important that endocrine neoplasms be distinguished from nonendocrine because the symptoms and the treatments for the two neoplasms are very different. The ...

x What an incredible honor to open our annual meeting with a chance to think with you about where we are, where we are going, and the moral tools we need to guide us on this important journey. Last fall, as I started planning for this talk, I was thinking in terms of metaphorical voyages and dream destinations. But it's not metaphorical anymore.
