Waves changed by structures cause longshore sediment transport to bring about shoreline changes, eventually causing coastal erosion. Many studies have been conducted to elucidate longshore sediment transport and identify theoretical formulas [2,3,4,5,6,7]. Wellen et al. assessed previous longshore sediment formulas for beaches with varying sand grain sizes. However, as the shoreline changes ...

We tend to look skywards when talking about pollution, but this problem is not confined to our skies. The soil in which our fruit and vegetables grow is also suffering its consequences, the effects of which getting to us directly, for instance, through the aforementioned foodstuffs. The time has come to look after what lies under our feet!
